

Dr. Monika Spokas
Developmental Optometrist

Dr. Amber Cumings, FAAO
Developmental/Pediatric/
Neuro-Optometrist

Dr. Monika Spokas and Dr. Amber Cumings, FAAO offer a variety of free in-service presentations to local professional teams. Contact marzenka@clarendonvision.com if you'd like to schedule an educational presentation for your staff.

Popular In-Service Presentation Topics

Vision Development (45 min.)

This presentation will highlight the stages of important developmental milestones, signs and symptoms of improper visual development, ways to screen for deficient visual skills, and education on how a functional eye examination can fully detect visual deficits. The presentation is useful for clinical professionals, educators, and anyone interested in an introduction to vision development.

Managing Myopia in Children (60 min.)

This presentation will highlight the etiology of myopia, risks associated with high myopia, ways to treat myopia, and resources on how to co-manage myopia management. The presentation is useful for optometrists and other clinical professionals that want to broaden their knowledge of this growing diagnosis in children. Discussion will include steps to take if you have a patient whose myopia is progressing, and treatment is needed.

Vestibular and Vision (60 min.)

This presentation will highlight the link to vision and the vestibular system, how to screen for potential visual deficits that can interfere with the vestibular system, and how lenses and therapy can improve deficits in vision that impact the vestibular system. The presentation is useful for physicians and clinical professionals who work with patients that experience symptoms of headaches, dizziness, or nausea as well as those who work with concussion and TBI recovery.

Vision and Learning (60-75 min.)

This presentation will highlight the stages of important developmental milestones, signs and symptoms of improper visual development, screening forms that can be given students/parents that can flag vision deficits, and education on how a functional eye examination can fully detect visual deficits. The presentation is useful for optometrists and clinical professionals, especially those in pediatric occupational therapy or physical therapy as well as educators and tutors.

If you are interested in a specific topic not listed above, please email marzenka@clarendonvision.com to discuss a tailored presentation for your staff.
